DETAILED ACTION

Allowable Subject Matter

Claims 1, 3 – 14, 16 – 33, and 35 – 54 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not show the use of a single music sequence containing both note event data and light configuration messages. The prior art discloses the use of two note event sequences (one to be sounded, the other to control lights). Also, the prior art generally shows mapping of note data to lights (e.g., see Brenner paragraph [0006]), however, this mapping file is not within the music data sequence (e.g., typically a separate file maps, say, all C#'s to a backlight). Furthermore, the prior art shows a separate note event track for controlling lights (e.g., using a drum track to control lights). However, the distinction in the Applicant's invention is that this mapping uses messages within the music sequence file (see Applicant's fig. 5, element 150). These configuration messages are not note event data (as they are in the prior art). As understood by the Examiner, the Applicant's invention could allow a user to configure and reconfigure mappings (as shown in Applicant's figure 9), while the prior art is silent on configuring mappings.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
